

On-Wall Units Care and Cleaning

To maintain the aesthetic quality of your On-Wall unit, follow the care and cleaning instructions detailed below:

Stainless Steel Surfaces

- **General cleaning:** Use a mild detergent and soft cloth. Wipe the surface and towel dry.
- Steel soap pads should never be used; particles can adhere to a stainless-steel surface and will eventually rust.
- Light scratches are normal for stainless steel. They will blend into the uniform finish pattern with time.
- **DO NOT USE BLEACH OR PRODUCTS THAT CONTAIN BLEACH ON STAINLESS STEEL, AS IT CAN AFFECT THE CORROSION RESISTANCE.**

Plastic Surfaces

- **General cleaning:** Use a mild detergent and soft cloth. Wipe the surface and towel dry.
- Wipe the surface clean to remove debris or buildup. This will not affect the antimicrobial properties of the material.

Electronic Displays and Sensors

- Wipe with a soft and dry cloth; preferably microfiber.
- If surface cleaning is necessary, lightly mist with deionized water and wipe dry.
